MESSAGE FROM THE PRINCIPAL

Dr.J. Venakata Lakshmi, Principal

Principal's Message

It gives me great pleasure to address everyone on the occasion of SASA programme. The theme for July 2026 is **Enumeration of Bulk Waste Generators**. Proper identification and documentation of bulk waste generators is an important step toward effective solid waste management and a cleaner environment.

This initiative helps us understand the sources of large quantities of waste, enabling better planning for waste segregation, recycling, and scientific disposal. It also promotes environmental responsibility among institutions, commercial establishments, apartments, and industries.

I encourage all students, faculty members, and volunteers to actively participate in this program with sincerity and dedication. Your efforts will contribute to a cleaner, healthier, and more sustainable community.

Let us work together to promote responsible waste management and build a greener future for generations to come.

Thank you.

OUTCOMES OF THE PROGRAMME

Understand the concept of Bulk Waste Generators (BWGs) and their role in effective solid waste management. Identify and classify Bulk Waste Generators such as educational institutions, hospitals, hotels, apartments, markets, and industries. Conduct systematic enumeration and data collection using prescribed formats and digital tools. Analyze waste generation patterns and estimate the quantity and types of waste produced by BWGs. Explain the importance of waste segregation, recycling, composting, and scientific disposal at the source. Promote compliance with Solid Waste Management Rules, 2016 and other relevant environmental regulations. Develop communication and community engagement skills to encourage responsible waste management practices. Contribute to sustainable urban sanitation and environmental conservation by supporting effective waste management planning and implementation.

THANK YOU
